Introduction

Chapter 1. About MindBoard 2 (Beta)

MindBoard 2 (Beta) is a freehand mind-mapping application with stylus for Android tablets. In addition, this edition has text input and image import feature.

1.1. Basic Concept

Less is more.

In order to concentrate your thinking activity, this application has less user interface. And you can quickly build your map by using a few basic operations.

1.2. Key Features

- Drawing your thoughts with Stylus
- Image import
- Text Input
- Multiple center nodes (mind maps) in one document
- PDF export
- Import and export documents with Google Drive

1.3. Requirement

- Android 4.4 Kitkat or newer.
- Digitizer STYLUS like S-Pen

This app is designed for Galaxy Note series and Galaxy Tab A with S-Pen.

If build your map with text and image only, you can use this application without stylus.

1.4. Installation

Get the [MindBoard 2 \(Beta\) App](#) on Google Play.

1.5. Getting help

If you have any questions, please [contact](#). And also your feedback will be much appreciated.

Using MindBoard

Chapter 2. Editor

2.1. Basic Policy

- **By Stylus** : Outputting your ideas freely
- **By Finger** : Editing and operating outputted your ideas.

2.2. Mode

MindBoard 2 (Beta) has **two mode** in the editor activity. One is **Map Edit Mode**, the other is **Node Edit Mode**.

Use **Map Edit Mode** when building your thoughts as mind-mapping, and use **Node Edit Mode** when output your ideas on a branch. In order to switch these modes by **double tap gesture with finger**.

In order to switch from **Map Edit Mode** to **Node Edit Mode**, you can also use doubletap gesture with **stylus**.

2.3. Map Edit Mode

Figure 1. Editor Activity (Map Edit Mode)

This mode is for building your thoughts as mind-mapping.
